

RON GAMBINI, VICE PRESIDENT OF MAINTENANCE AT THE TRANS GROUP, NAMED TO RTA CLIENT ADVISORY BOARD

July 13, 2016

Ron Gambini, Vice President of Maintenance at The Trans Group, has been named to the inaugural client advisory board of RTA Fleet Management, a leader in the fleet management industry for nearly three decades. The announcement was made by RTA Fleet Management Company CEO Josh Turley.

“Ron was named to the RTA Client Advisory Board because of his experience heading up maintenance operations at one of the largest school and transit transportation companies in New York State,” explains Turley. “Over the years, as an RTA client, he has provided us with extremely valuable feedback that resulted in enhancements to our fleet maintenance software packages. At RTA, we believe the best way to meet the needs of our clients is to hear from people like Ron directly on an ongoing basis, and that’s what the RTA Client Advisory Board will accomplish through regularly scheduled calls and meetings. We look forward to his continued insights on the new advisory board, which is comprised of representatives from a diverse array of industries and fleets.”

Gambini started his career with The Trans Group 16 years ago and is today responsible for a fleet of over 1,000 vehicles and a maintenance department that allows The Trans Group to perform almost all maintenance in-house. Under his direction, The Trans Group enjoys a vehicle-inspection pass ratio that is well above the New York State average. Gambini also helped oversee the integration of computers into the everyday maintenance work stream, enabling the company to more readily identify trends as they develop and instantly reflect any upcoming maintenance cycles.

With more than 1,700 employees, The Trans Group operates over 1,200 school and public transit buses in lower New York State and Long Island. The company is actively involved in the school bus and transit industries on a state and national level.
